

Butterfly Facts

**DURING ITS LIFE A BUTTERFLY PASSES
THROUGH FOUR STAGES . . .**

... AND
THEN FLIES
OFF IN
SEARCH OF
A MATE . . .

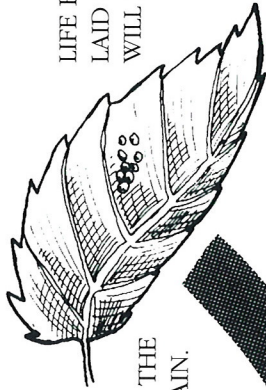

THE
BUTTERFLY
RESTS UNTIL
ITS WINGS
ARE DRY . . .

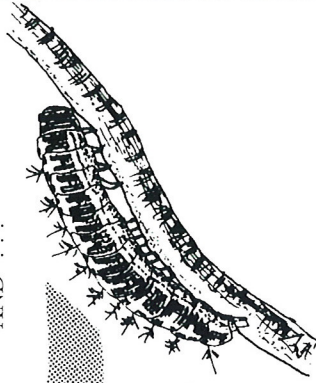

THE ADULT BUTTERFLY EMERGES.

... TO BEGIN THE
LIFE CYCLE AGAIN.

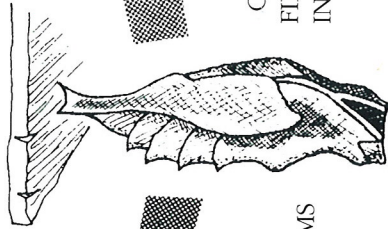

LIFE BEGINS AS AN EGG
LAID ON A PLANT THAT
WILL BE FOOD FOR . . .

... THE CATERPILLAR.
AFTER HATCHING, THE
CATERPILLAR GROWS,
HELPED BY A
VORACIOUS APPETITE
AND . . .

FIVE OR SIX CHANGES OF SKIN!

ONCE FULLY GROWN, THE CATERPILLAR
FINDS A SUITABLE SITE AND FORMS ITSELF
INTO A CHRYSALIS, OR PUPA.

IN THE PUPA THE
BUTTERFLY REFORMS
ITSELF UNTIL
EVENTUALLY . . .
